[No thanks, just start my download.](#)

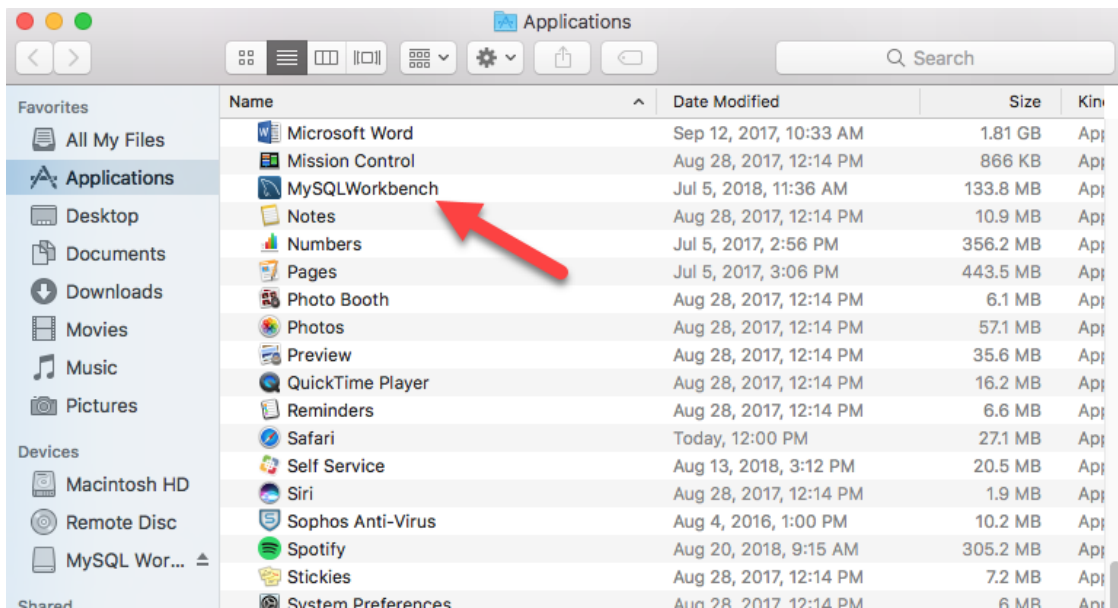

In the Chrome browser the file download will appear in the lower left hand corner. When the download completes, click on the .dmg file which will begin the installation process.

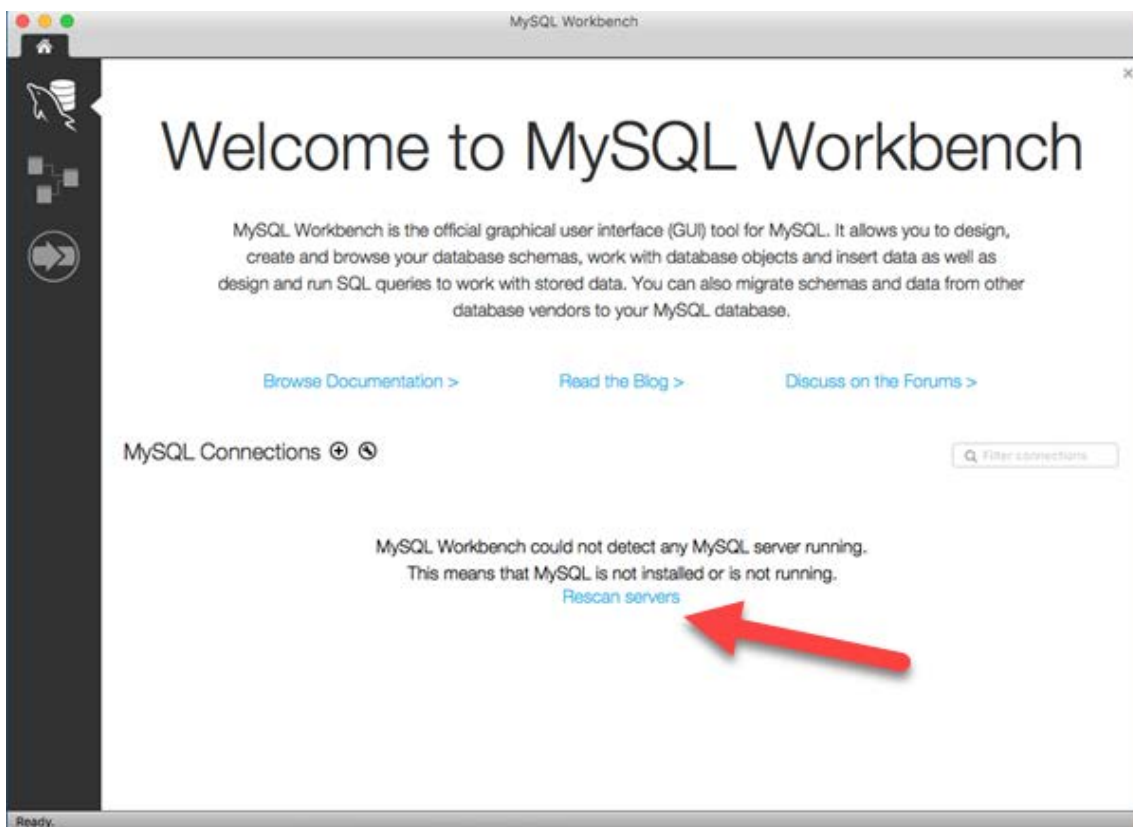

Once the installation is completed, move the “MySQL Workbench” icon to the Applications folder.

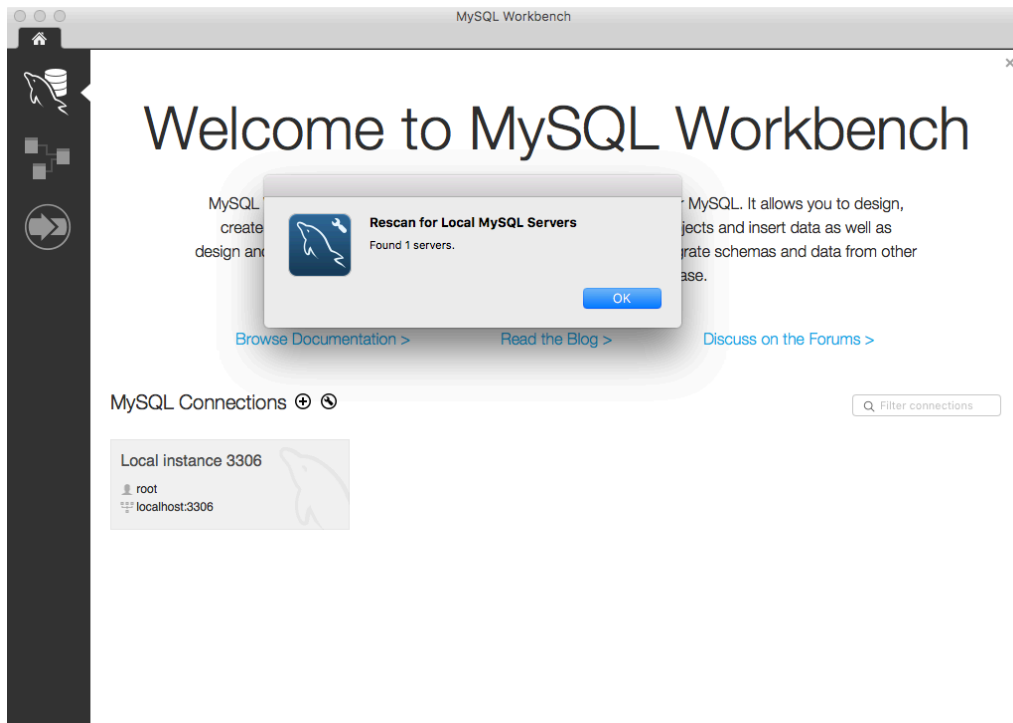

The icon no appears in the Applications directory. Click on the MySQL Workbench icon to launch the proram.

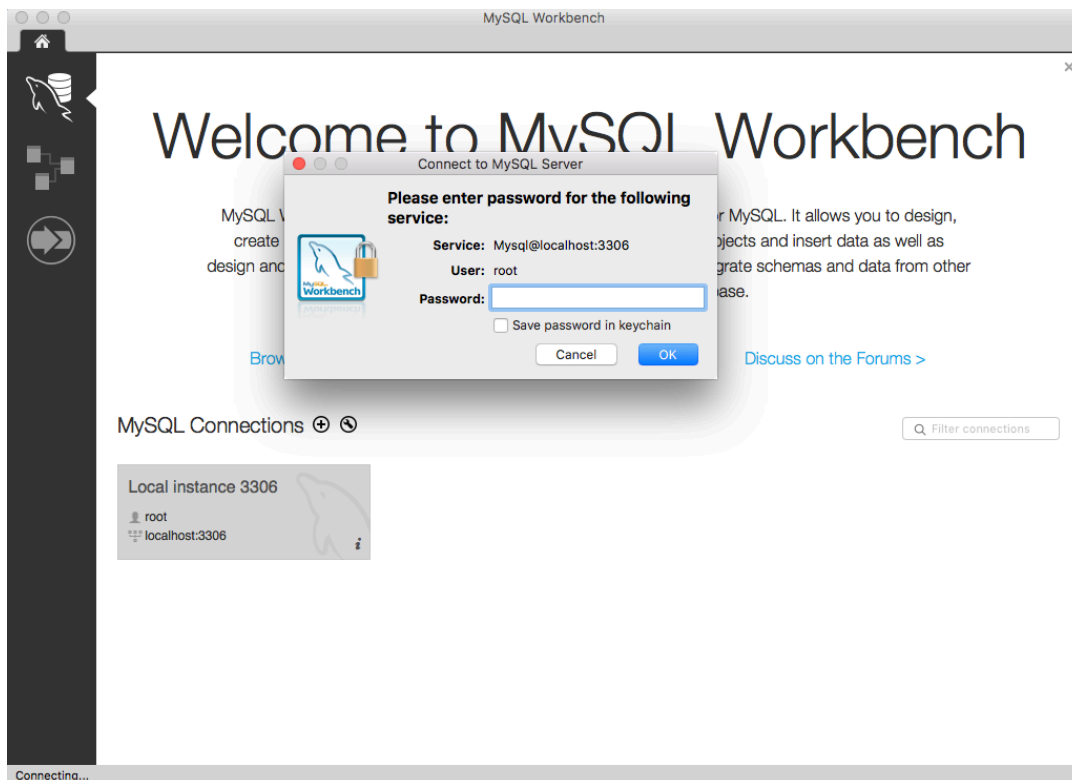

From the MySQL Workbench screen click on “Rescan servers.”

You should get the message that one server was found. Click “OK.”

When prompted, enter the password you created when MySQL was installed.

You should now see the MySQL Workbench interface.
